15 Years of experience

Professional Bio:

Claudia tackles complex health challenges across Africa, successfully developing and scaling programs that have improved millions of lives. As a project leader in several Francophone African countries, she has engaged with critical issues head-on - from helping families find affordable healthcare to revitalizing unmotivated health workers. Claudia's approach combines innovative thinking with rigorous project management to create practical solutions that work. Where others see obstacles, she sees opportunities for creative solutions. Blending strategic vision with adept execution resulting in measurable improvements in household health and healthcare delivery quality.

Claudia has over 15 years of reliable project management experience in four global health projects. She loves creating space for problem-solving, giving people the time and prompts to organize knowledge, make unlikely connections, and test ideas. She combines great management and creativity to solve

Skills & Expertise:

Program & Grants Management, Policy Development, Capacity Strengthening, Global Health & Humanitarian Assistance, MEL, Proposal Writing, WASH

Sectors of Work:

International Development, Public Health, Diplomacy & Foreign Affairs, Democracy & Governance, Technology & Innovation

Languages Spoken:

English, French

age-old health and development challenges, particularly addressing environmental protection, managing the effects of climate change on populations in Africa. Claudia likes to work on policy, advocacy, and behavior change, focused on the effects of extreme heat, drought, and flooding.
